Reasons for Allowance

1. Claims 1-11 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 limits the method for removing a die from a plastic package to heating the plastic so that it cracks and grasping the package on either side of the fracture and opening the package to remove the die from the cracked package. This limitation, in combination with the other limitations of claim 1 is not taught or suggested by the prior art of record. Damiot (US 5,424,254) places the package in either hot fuming acid or heats the package and follows this step with quick cooling to fracture this package, but fractures the pack so that the resin bursts, leaving the bare chip. Thus there is no removing step. Young (US 6,429,028) etches the package to remove the die. Lowry (US 6,335,208) uses a laser to open the package for die removal. Mahanpour (US 6,309,899) grinds the surface of the package to remove the die. Kitamura (US 6,981,585 and US 6,223,893) teaches a method to prevent the package from cracking prior to opening it at the side and removing the die.

Claims 2-11 are allowed as being properly dependent upon allowed claim 1.
